NCC Discovers Claro Vida Beneficial to Dialysis

Water refilling stations are not the only establishments that has benefited from the quality product that Claro Vida offers. As an ion exchange regenerant salt that is very potent in water purifying, Claro Vida is also the number one water purifying salt in most dialysis centers in the country.

The Nephrology Center of Caloocan (NCC) is one of the many dialysis centers in the country that uses Claro Vida in their water purifying needs. NCC uses Claro Vida in their 9 other dialysis centers located in West Avenue, Quezon City, Davao City, Legaspi City, Malolos, Bulacan, Batangas City and San Fernando, Pampanga. Their Caloocan branch alone has more than 130 dialysis patients and 200 treatments are being scheduled every week. With this number of patients and with the high purity requirement in the water used during dialysis treatments, Claro Vida provides the highest quality of water purification.

Claro Vida is customized for the purpose of backwashing or regenerating the resin in water softener. It is a high quality salt capable of producing high quality brine for best resin regeneration. It is uniformly packed in 12.5 kg size that can be easily poured to exactly address the salt requirement per regeneration. It is also uniformly packed in polyethylene bag which is a strong packaging material to avoid spillage. It has a convenient packaging which is designed for easy handling due to its lightweight material. It comes in small packaging that makes it more affordable and easier to store.

Kidney diseases is one of the major causes of deaths in the country. Undergoing dialysis treatments is physically and financially tasking to patients. Dialysis centers owe it to their patients to provide no less than 100% water purification that is why they use Claro Vida.

"Claro Vida is customized for the purpose of backwashing or regenerating the resin in Water Softener"

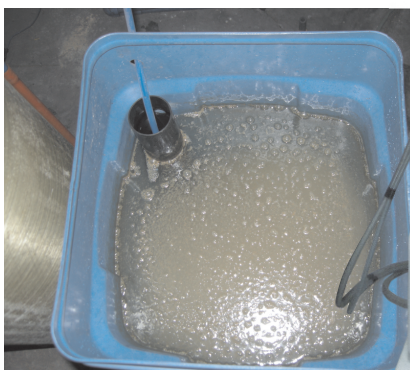

Nephrology Center of Caloocan uses Claro Vida ion exchange regeneration technology in their nine dialysis centers.

NCC Nurses with Ms. Katherine Bugayong, Dr. Wilmyr Hababag, and Ms. Maria Christine Decena in the dialysis room

Claro Vida satisfies the water purification quality that is required for dialysis treatments among kidney cancer patients in the 9 branches Nephrology Center of Caloocan.
